Projects

Bank Loan Analysis

Power Bi Project

- **Dashboard 1: Summary:** Designed a comprehensive dashboard showcasing key lending KPIs (Total Loan Applications, Funded Amount, and Amount Received) with MTD and MoM comparisons, enhancing performance monitoring.
- **Dashboard 2: Overview:** Developed visualizations for monthly trends, regional analysis, and loan distribution metrics, providing actionable insights into lending patterns and borrower profiles.
- **Dashboard 3: Details:** Built a detailed dashboard to analyze loan portfolios and borrower data, enabling data-driven decisions on loan performance and operational efficiency.

Road Accident Analysis

Tableau Project

- **Casualty Analysis Dashboard:** Developed visualizations for total accidents and casualties with YoY growth comparisons, categorized by accident severity.
- **Donut Charts:** Designed custom charts to illustrate casualties by weather conditions and road surface types, enhancing situational insights.
- **Bar Chart:** Created a bar chart showcasing casualties by road types, providing a comprehensive view of accident distribution.
